# *Imagin's Newest IntraOral Camera ...hits the street.*

**HotRod**

Our new little HotRod is modular in design, equipped with an anti-fog lens tip, HO-focusing optics, macro focus and the highest resolution CCD chip, just the short list of our standard equipment. Fact is, the HotRod from Imagin is destined to set the new dental standard for intraoral camera design, versatility — and best of all — patient comfort.

**IMAGIN**  
SYSTEMS CORPORATION

Providing Solutions for the  
Dental Professional.

## Dental design with the dentist in mind.

Every design element has been made with you in mind. Features such as strong lightweight polycarbonate hand piece, a sleek lens tip, and seamless integration across all digital and analog networks. Not to mention full compatibility with our DentalEye3 and other imaging software.

If you're looking for superior value for your dental practice and the optimal comfort for your patients — then the choice is simple. Test drive a HotRod today.

- CCD Technology: features Sony's latest breakthrough chip technology
- High output optics (HO)
- Over 100 line pairs resolution; macro setting at 400 line pairs per mm
- Less than 2% distortion
- 90° retro viewing; 80° field of view
- Focal range with focusable intraoral lens 3mm (macro) to 60mm (full smile)
- Focal range with cosmetic extraoral lens zero mm to infinity
- Lightweight/modular/portable design allows features as your practice grows
- Electronic features: X-ray mode (B/W), electronic arrow pointer, multi-level light control with on/off
- Optional freeze frame cartridge plug-in port
- Choice of docking stations: wall mounted or counter top
- Lightweight detachable anti-torque hand piece cables provide more comfort

Optional memory cartridge with button controls allows you to store images in quad or single format.

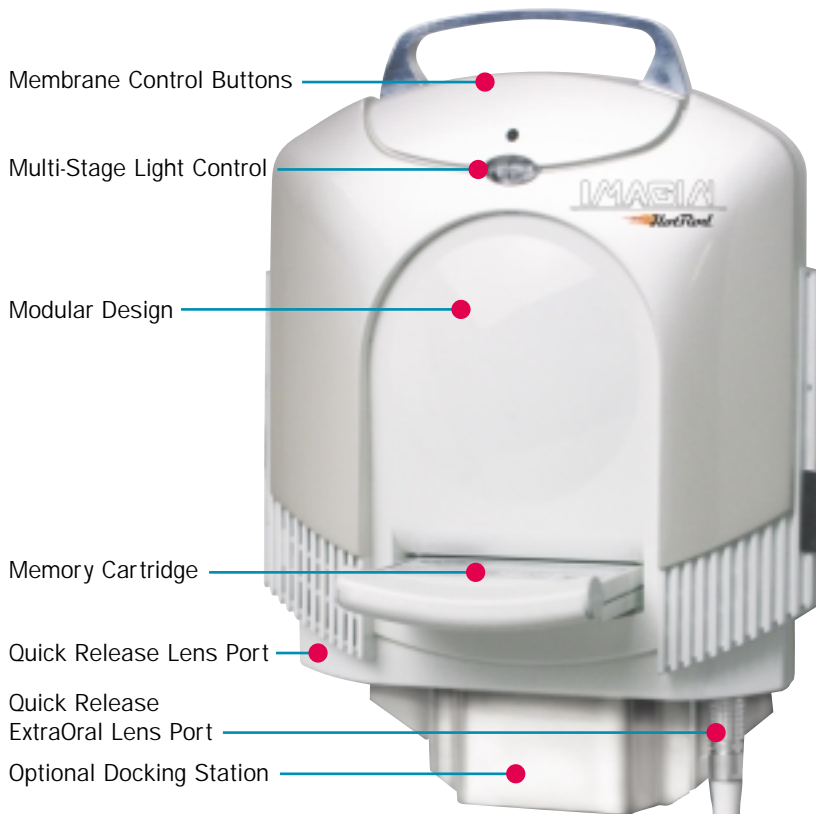

### Imagin repairs intraoral cameras like nobody else

Conversions of your existing camera into a "New Intraoral System...guaranteed."

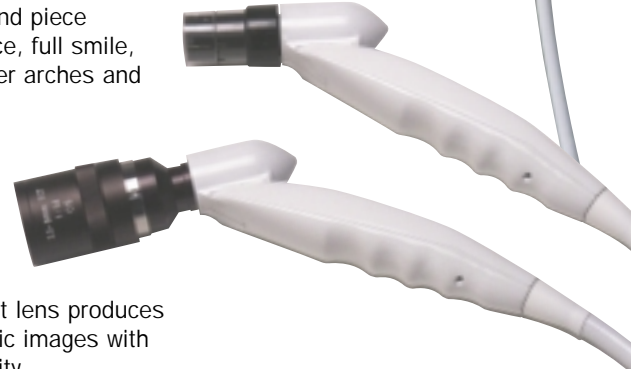

### Printer repairs:

AcuPrinter, Hitachi, Panasonic, Mitsubishi, Sony and Toshiba

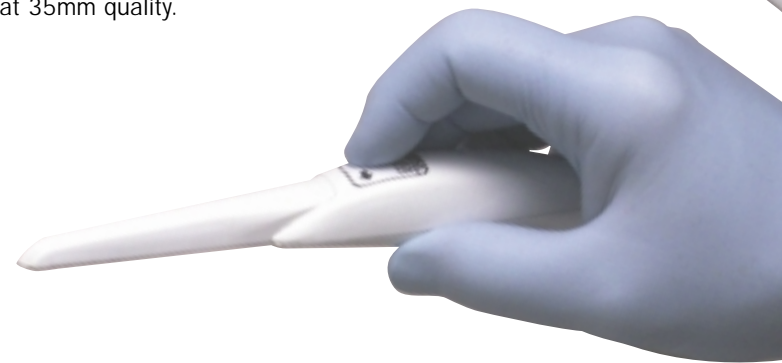

**Superior service and fastest turnaround in the dental industry.**

Standard 0° hand piece provides full face, full smile, quadrants, upper arches and lower arches.

Optional portrait lens produces brilliant cosmetic images with flat 35mm quality.
